IVIR LECTURE SERIES

The UK copyright law's approach to issues generated by AI

by Prof. Estelle Derclaye
(University of Nottingham)

6
February
2025
REC A5.24

www.ivir.nl/events/

The UK was both preceding (with the introduction of the TDM exception in 2014) the EU and is now lagging behind the EU in its treatment of issues created by the emergence of AI and more specifically GenAI.

This talk will provide an overview of the TDM exception in the UK, the current Getty Images v Stable Diffusion litigation in the High Court and the recent consultation launched by the UK government which aims to broadly follow what the EU has done to resolve the same issues.

Speaker

Estelle Derclaye is Professor of Intellectual Property Law at the University of Nottingham. She is the author and editor of several books and articles in the field of IP law and has done expert work for the UK Intellectual Property Office, the European Commission and national and foreign law firms. Her main areas of research are copyright and designs, database protection, IP overlaps, IP and climate change, and IP and well-being.
